

Do you know

How to enjoy walking with your dog in safety?

STEP 1 You should recognize only 2 ranks of leader and follow in dog world !!

STEP 2 To avoid the 5 ways of bad leashing on the street!!

STEP 3 Might have a lead of the HIPPOmate to enjoy the walk ease and more fun!!

The status of leashing	Dogs viewed as		Degree of safe / danger						
	leader is	follower is							
 <p>The leash is too long Causing the result possible The dog read the message as that seems to be free, and It's possible to react by intuitions easily , such as a sudden rush, run and a wilful drag,...while something provoked to dog.</p>	 itself		High 						
 <p>The leash is too short and tight Causing the result possible The dog read the message as that seems to be restricted, and it's possible to react a nervous of everything, such as an impulse, focusing defense, easily anger, and offensive.</p>	 itself		High 						
 <p>The leash be misused for a punishment tool Causing the result possible Without question, we give the message and order to dog by the leash,building up the good trust between dog and owner, absolutely not to leash with bad-tempered pulling and dragging, or loose control to shout and yell, dogs always get hurt and the worst of viewing the leash as trustless and a punitive tool.</p>	 itself		High 						
 <p>The walker takes control of changeable clearance at will for dog Causing the result possible The unclear messages , and leashing with changeable clearance at will that would press the dog to react by an instinct of wildness,... dogs need a good private space to ease up all nervous from the street.</p>	 itself		High 						
<p>The leash with bad changing method is bad for closer control Causing the result possible The bad change contains some potential risk , it'll imperil directly to the dog owner, and changeable lengths also confuse the messages and orders from the dog owner that the dog really don't know what to do and be slighted often.</p>
